

Hot Off The Press!

We are pleased to announce the publication of a new booklet for kids Grades 4–6 called “Discovering the Waters of Arizona”. The Governor of Arizona, Janet Napolitano, will provide this booklet to all 4th graders within the state of Arizona by the second week of October 2005. Booklets will be distributed throughout the state through local school district offices.

Arizona saw a need to provide students with a booklet that explained our state’s water resources and explored subjects like water management, groundwater, riparian areas, etc. These subjects can be difficult to communicate to students but this booklet was designed to present water topics in an easy-to-understand fashion and make learning about water fun!

This booklet is a collaborative effort between the Arizona Department of Water Resources, The Bureau of Reclamation, Project W.E.T./AZ W.E.T. and the University of Arizona Water Resources Research Center.
